

Management Working Group

David Berley

Kevin Lesko

Dick Gowen

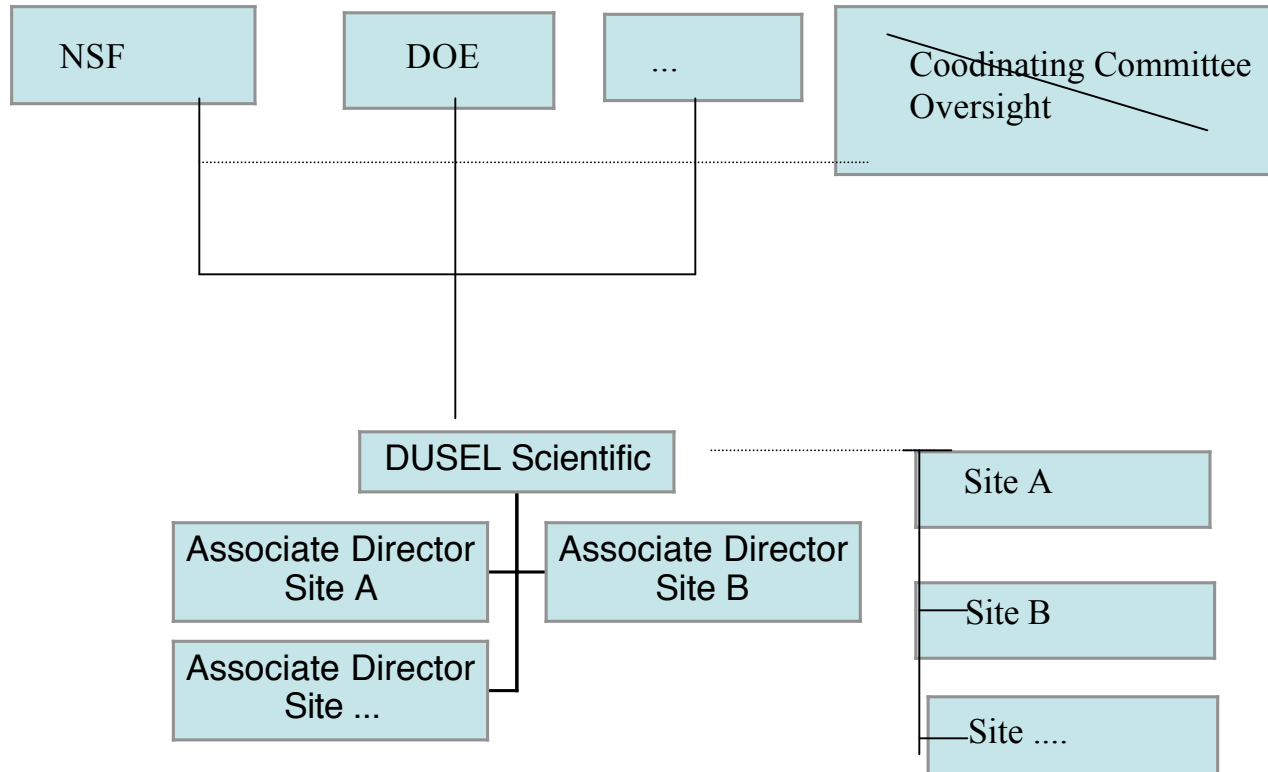

Issues

- Interface between Site Owner and Science Laboratory
- Possible multiple sites
 - Central scientific management?
- Possible International Laboratory Cooperation
- Multi-Agency support

Multiple Agencies Single Scientific Laboratory
Multiple Sites
(Example)

- Federal Agencies
 - NSF, DOE, ...
 - Coordination mechanism
- Laboratory Sites – Site A, Site B
- DUSL Scientific Laboratory
 - Manages the scientific program at the sites
 - Associate Director with operating organizations at each site

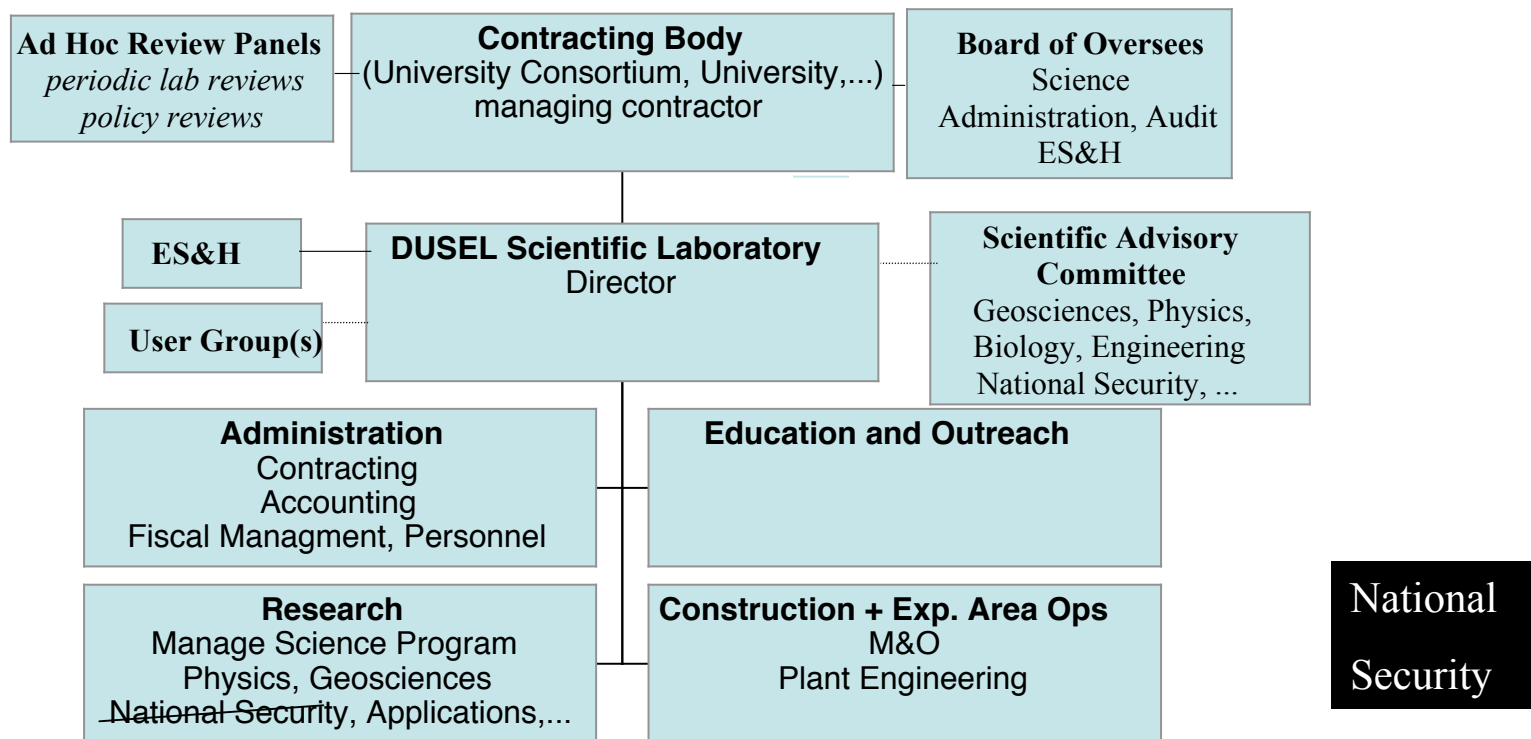

Multiple Agencies Single Scientific Laboratory Multiple Sites (Example)

Scientific Laboratory

- Laboratory managed by scientists
- Managing contractor
 - Institution or consortium of institutions with strong connections to the scientific community
- Laboratory has a scientific staff to participate in experiments and available as resource to lab
- The laboratory be open

Deep Underground Science and Engineering Laboratory Management

Relation between Owner/Laboratory

- Safety
- Liability
 - EH&S
- Excavation of caves and drifts
- Common Services and Infrastructure
 - Operation and maintenance of the access
 - Electricity, Water, Ventilation, Communications ...
 - Surface and Underground Space
